

inFORM Laminate

The inFORM range is manufactured to a high quality standard with built-in strength and flexibility – developed specifically for the Australian market. The inFORM High Pressure Laminates (HPL) are a great choice for medium-impact applications such as kitchen bench tops, bathroom vanities, and commercial counters. HPL is often used in commercial spaces due to its durability and longevity.

The inFORM colour offering sweeps from bright vibrant solids to soft patterns. Solid colour sheets can be post formed to a curved edge of 8mm radius, far tighter than the industry standard 12mm radius. The Ultra Matt colours can be post formed to a tighter 5mm radius.

When specifying inFORM, send a copy of the finishes schedule with estimated quantities and timing to projects@forest1.com to reserve stock. Specifications work best when they include the colour, finish, 0.7mm thickness, and specifically mention inFORM and ForestOne.

Sizes

- 4900 x 1300 x 0.7mm
Brushed Aluminium
- 3600 x 1600 x 0.7mm:
Solid, Ultra Matt, Matt, Patterns
- 2450 x 1240 x 0.7mm
