Project Safety and Health with HI-MACS Acrylic Solid Surfaces

Government Safety Warnings have been issued regarding exposure to Crystalline Silica dust contained in engineered stone products. The threat of Silicosis and other deadly health issues have become clearer, prompting the government to these actions.

As an acrylic solid surface, HI-MACS does not have Crystalline Silica as an ingredient nor is it used in any part of the manufacturing process. HI-MACS does not present these same critical exposure issues, and is Greenguard and NSF-51 Certified.
